

To
Bimal saha.
Garden state Cultural Association.

Sir,

I am Ranjan Paul, son of Bharat Chandra Paul. I am sponsored by your association. My hometown is Habibpur, a small village of West Bengal, situated near to the Ranaghat in Nadia district. But to attend my class I am staying at college hostel,

Regarding my family I would like to say you that my family is very simple and I am very happy with my beloved parents and my elder brother. My parents are not educated so much—that is why my father have to do hard work to earn money.

From my childhood my father used to say me "you shall study medical." But I had no plan about my future I was just studying. And when I made a good result in 10th class one of my school teacher started to help me. He helps me mentally, financially and he also helped me to find out my private tutor. At last I have got chance in medical just after my Higher secondary examination.

Now I am studying at ~~Murshidabad~~ Medical College And Hospital. I have passed 1st professional MBBS examination and now it is 2nd professional MBBS class. I have to complete two more professional examination, duration of 3 years and last of all 1 year of Internship. Nowadays I am just trying to learn everything to treat a patient easily.

I will take part in internship just after passing out 2nd professional part II examination. At the time of internship I will get stipend from my college. Then the stipend will help me to study higher.

A scholarship is very important to a financially weak student. And I am also not an exception, the scholarship I am getting (from GSCA)

is like a gold plate to me to eat my study well. I have already said that hard work of my father is the only major financial support for us. And it was very difficult to us to manage everything without this scholarship. Our family ex-
pense, my study and my elder brother's study expense all of these things always hampered my concentration. But now after getting this scholarship I am really free from this huge tension which helps me to study with full of concentration. Only one thing I can say that in absence of MUKTI I will not be a good doctor. Really MUKTI has given me mukti.

Whenever I was helped I just thought that I have to return this help to others to make me neutral. But I have realized that I have to help a lot of needy person. And I have made it my dream. So, in my future there are two things. One of them is my career and other is my dream. About my career, I want to study higher after completion of MBBS, I will appear in PG Entrance examination to get chance in MD or MS. And about my dream I want to be a good man. A good man means honest, helpfull etc. I want to be such a helpfull person that if there is 1% of possibility to help someone then I will do it.

I am very happy with these things whatever happened with me. GSEA (Garden state cultural Association) has fulfilled all of my dreams. I know that only a thanks is not enough in return of this big help. At the end of everything I want to say thanks to GSCA and MUKTI and all of the members of these two association to select me as a needy student.

Your faithfully,

Ranjan Paul.
