## SUB: OWING GRATITUDE FOR YOUR KIND FAVOUR

---

Sir,

with due respect, I, Tarik Hassan at the very beginning of this letter want to submit my hearty gratitude for your continuous financial help in my study by which I have been benefited a lot. Now I am studying in mechanical engineering (3rd year) at Jadavpur University. This is most probably the fourth letter to you from my side. I want to share with you a shocking news that my father has passed away on 3rd April this year leaving us alone. He had been suffering from bronchitis severely from past few years but his death was very sudden and I faced a lot of problems to cope up with this situation. He could not earn money due to his illness but sometimes he used to do his quack practice in our village by which he hardly managed 2000 per month. The big issue is that we have lost our source of inspiration and guidance. My mother can hardly manage our family expenses by private tuition and often she has to lend money from our relatives. My elder sister has completed B.A and she has a wish to take coaching for WBCS but for this work large amount of money is needed. My mother is quite tensed thinking about how she will manage this amount.

Truly speaking, Mukti scholarship has helped me a lot to cope up with all financial problems. Besides, I have got a private tuition of remuneration 1500 rupees per month. But you know all these are not sufficient for bearing my expenses as minimum monthly 5000 rupees is obligatory for maintaining food, lodging and educational costs in Kolkata. I am having problems to manage my expenses since my father has died as I do not get any financial help from my family rather I have to give money to my mother whenever a critical situation comes. Besides, I want to take coaching for GATE and IES examination for which also approximately 70000 rupees is necessary which is impossible for me to afford. If I can accumulate some money from now then it will be beneficial for me for future investment.

I had a wish to continue my higher study in future but in such situation, a job is very necessary so I am preparing for jobs. But I want to be attached to academic life and do my research along with. My area of interest is 'Entropy, Energy and the end of the world' and also 'Einstein's relativity theory'. In future, I want to be attached to social works which gives me immense pleasure and also I have a wish to found a nursery school in my village where children will get advanced teaching at free of cost.

I therefore earnestly request you to kindly continue your help in my study and if possible, please increase the amount so that I can continue my study smoothly. My dream is to perform best, to do some miracle in my educational field as well as to serve the needy at my level best being a self-dependent man. I hope your helping hand will take a major role in fulfilling my desired dreams and aspirations. I shall be ever grateful to you.

Yours Faithfully

Dated: 23.09.2017
