Sub: Owing Gratitude for Your Help

Sir,

This is the fifth time I am writing to you and I am very glad to express my thoughts before you. At the very beginning of this letter, I want to submit my hearty gratitude for your continuous financial help in my study by which I have been benefited a lot. Now I am studying in mechanical engineering (3rd year, 6th sem) at Jadavpur University. This is most probably the fourth letter to you from my side. In the previous letter, I told you that I have lost my father. He had been suffering from bronchitis severely from past few years but his death was very sudden and I faced a lot of problems to cope up with this situation. The big issue is that we have lost our source of inspiration and guidance. My mother can hardly manage our family expenses by private tuition and often she has to lend money from our relatives. My elder sister has completed B.A and she has a wish to take coaching for WBCS but for this work large amount of money is needed. My mother is quite tensed thinking about how she will manage this amount.

Truly speaking, Mukti scholarship has helped me a lot to cope up with all financial problems. Besides, I have got a private tuition of remuneration 1500 rupees per month. But you know all these are not sufficient for bearing my expenses as minimum monthly 5000 rupees is obligatory for maintaining food, lodging and educational costs in Kolkata. I am having problems to manage my expenses since my father has died as I do not get any financial help from my family rather I have to give money to my mother whenever a critical situation comes. Besides, I want to take coaching for GATE and IES examination for which also approximately 70000 rupees is necessary which is impossible for me to afford. If I can accumulate some money from now then it will be beneficial for me for future investment.

I had a wish to continue my higher study in future but in such situation, a job is very necessary so I am preparing for jobs. But I want to be attached to academic life and do my research along with. My area of interest is 'Entropy, Energy and the end of the world' and also 'Einstein's relativity theory'. In future, I want to be attached to social works which give me immense pleasure and also I have a wish to found a nursery school in my village where children will get advanced teaching at free of cost.

I do not want to be a distinguished engineer only but also an ideal philanthropist and a shelter of hope for hopeless. Only then I can take pride in myself and feel that my life has not gone into vain. I do not want to elongate words further. Last but not the least, I earnestly request you to continue your help towards me so that my arduous journey becomes easier for me and I can reach my desired goal. I will be ever grateful to you.

Dated: 03.02.2018

Yours Faithfully
Tarik Hassan
